Burleson conducts commissioned research for governmental and nongovernmental entities. Burleson Institute partners with the United Nations Climate Technology Center and Network to advise countries. This builds on over a quarter of a century of energy-climate-water governance. With a degree in International Law from LSE, Burleson writes reports for the UN and presents on treaty making for the UN Office of Legal Affairs / UNITAR, having participated in the drafting process for the United Nations Framework Convention on Climate Change (UNFCCC) and Agenda 21. Burleson is an expert contributor to the International Panel on Climate Change (IPCC). Burleson Institute advises developed and developing countries, regional entities, tribes, and a range of interrelated state and non-state actors. Burleson has served as UNICEF, UNEP, NWF, ASIL, and IUCN delegate to Bali, Copenhagen, Cancun, Durban, Doha, Warsaw, Lima, and Paris UN Climate Conferences. She has served on the International Law Association's Committees on Sea Level Rise and on Principles Relating to Climate Change, International Bar Association Working Group Report on Human Rights and the Environment, IUCN's Climate Change Core Group, and the National Wildlife Federation President's Advisory Council. As a law professor and Fulbright Senior Specialist, she has taught Energy Law, Human Rights and Environment, International Environmental Law, Public International Law, United Nations Law, International Law and China, Land Use, Property Law, International Economic Law, Trade, and the Environment, Water Law, and Environmental Law. She has been a peer reviewer for Fulbright, Oxford, Cambridge, National Academies, and a range of other academic, ministerial, and other legal/interdisciplinary publishers. Her ongoing public/private work brings together international economic, social, and environmental communities to coordinate energy-climate-water solutions. Through the Burleson Institute, she shares analysis on evolving best practices. Institute participants help address issues ranging from local to global initiatives. Burleson has conducted legal research for Amnesty International's London-based International Secretariat and New York-based Research Division. As a scholar, practitioner, and governmental advisor, she has provided climate-energy expertise to the French, Japanese, Peruvian, United States, and Uruguayan governments. She has also provided legal advice to a wide range of developing countries through the Legal Response Initiative coordinated by Columbia University School of Law.

BURLESON INSTITUTE & PUBLIC INTEREST SERVICE:

- **United Nations:** participated in drafting process for *United Nations Framework Convention on Climate Change (UNFCCC)*, *Agenda 21* and *Rio Declaration*. Advised UNICEF's Senior Advisor for the Environment and New York Director of UNEP. Conducts legal research, serve as outside peer reviewer, and write reports for UNESCO, UNDP, UNEP and UNICEF with a particular focus on design, development and implementation of human rights and environmental programs. Deliver presentations at UN conferences and help branches and partners of the UN to facilitate forums at a variety of international conferences. Expert contributor to the International Panel on Climate Change (IPCC). (1990-present).
- **Energy Law and Policy: Evolution of Open Access Innovation Sharing:** this course considers energy access and innovation and includes a hands on service learning component that teaches participants the evolution from native to modern maple syrup production, to biomass, natural gas, reverse osmosis, solar, efficiency, and green building/restoration. This series can be combined with the Energy Law Certificate (2 credits) that considers the challenge of addressing the increase in energy demand within a carbon-constrained world. It studies the use of coal, oil, gas (including hydraulic fracturing), nuclear, wind, solar, hydro, and biofuels. Participants consider electricity generally, cogeneration, transmission line expansion, human exposure, and environmental balancing factors in any sound energy/water policy. This class has also been taught by Prof. Elizabeth Burleson at the University of Connecticut School of Law, USD School of Law, and Pace University School of Law (Elizabeth Haub). (2008-present).
- **Solar Swim: Fund 60 miles in 60 days,** this Public Interest Network Grant sustains the Burleson Institute's ongoing work. Funds are also raised through "Kayaking and Cantaloupe," Silent Auctions, Raffles, publications and multi-media education and outreach. Elizabeth Burleson has swum over 1500 miles to date. Participants may be able to make tax deductible donations through the **Burleson Institute**

- **Sustainability Series - Forums and Field Research:** the International Community's Evolving Culture of Peace and Security (including UN Tours and treaty drafting conference participation) • Watershed and Wildlife Service-Learning Research, participants collect research for submission to Cornell University as well as local watershed resilience initiatives. Over three decades of assessing public health, indicator species and watershed integrity have involved fellows working on water-energy-climate governance research. Ongoing education initiatives integrate field and analytical research. • Innovation & Resilience Solar Fest, Micro/Macro Festivals of Light. • Environmental Human Rights Defender Forums / Human Rights - Environmental Decision-making Coordination. • Web Weaving Workshops (including responsive designs, integrated solutions, search engine optimization, simple effective layouts, and efficient upkeep). • Public Interest Network partnering, including speakers series, film / discussions, field research, food security and related sustainability - governance evolving best practice sharing. Forums range from treaty drafting to youth community garden service learning and food production for local food banks. This work is legally grounded in the Education Outreach Article 6 of the United Nations Framework Convention on Climate Change (UNFCCC). (1981-present).
